Berk-Tek Introduces Highest Performing, Smallest Diameter Category 6A Cable

New Holland, PA – February 10, 2020 – Berk-Tek, a Nexans Company and leading manufacturer of network infrastructure solutions, introduces LANmark™-SST, a new high-performing, small-diameter Category 6A cable.

LANmark-SST is the smallest diameter Category 6A CMP UTP construction available, at 0.25 inches. This reduced diameter offers better flexibility, optimized cable management, and improved tray-fill ratio than the average Category 6A cable, making it ideal for high-density installations.

LANmark-SST has a specially designed insulated metallic isolation wrap that provides superior heat management and noise-cancelling performance. The insulated design prevents electrical energy from running along the shield, eliminating the need for grounding.

*"This newest cable from Berk-Tek offers the outstanding signal isolation and excellent high-PoE performance that our customers need, making it a great choice for high-power, high-bandwidth applications like 802.11ac wireless, HD video, and IP security," says **Brian Simmons, Copper Product Manager for Berk-Tek.** He adds, "At the same time, the smaller diameter is a great option for high-density installations. And we're able to offer all these benefits at a cost-effective price point."*

LANmark-SST is available for immediate order.

About Berk-Tek, A Nexans Company

Berk-Tek is a premier manufacturer of more than 100 different network infrastructure solutions. For more than 50 years, Berk-Tek has led the industry in the development of high-performance and enhanced fiber optic and copper cables designed to transport high-speed data, voice and power transmissions. Berk-Tek's world-class research and development teams are dedicated to developing innovative structured cabling solutions that are critically important to managing the demands of today's emerging technologies. Berk-Tek has manufacturing facilities in New Holland, PA and Fuquay-Varina, NC. For more information, visit www.berktek.com.

About Nexans

Nexans brings energy to life through an extensive range of advanced cabling systems, solutions and innovative services. For over 120 years, Nexans has been providing customers with cutting-edge cabling infrastructure for power and data transmission. Today, beyond cables, the Group advises customers and designs solutions and services that maximize performance and efficiency of their projects in four main business areas: Building & Territories (including utilities, e-mobility), High Voltage & Projects (covering offshore wind farms, submarine interconnections, land high voltage), Telecom & Data (covering data transmission, telecom networks, hyperscale data centers, LAN), and Industry & Solutions (including renewables, transportation, Oil & Gas, automation, and others). Corporate Social Responsibility is a guiding principle of Nexans' business activities and internal practices. In 2013

Nexans became the first cable provider to create a Foundation supporting sustainable initiatives bringing access to energy to disadvantaged communities worldwide. The Group's commitment to developing ethical, sustainable and high-quality cables also drives its active involvement within leading industry associations, including Europacable, the NEMA, ICF or CIGRE to mention a few. Nexans employs nearly 27,000 people with industrial footprint in 34 countries and commercial activities worldwide. In 2018, the Group generated 6.5 billion euros in sales. Nexans is listed on Euronext Paris, compartment A.
