Introducing the
1500 ft innovation
from Berk-Tek

Our innovative new box includes 1500 ft of cable so your installs are more efficient than ever.

YOU ASKED FOR IT. WE LISTENED.

YOU ASKED FOR IT. WE LISTENED.

Introducing the
1500 ft innovation
from Berk-Tek

With 1,500 feet of cable in each box, versus standard 1,000 ft boxes, smartPAK delivers the convenience and ease of use of a traditional pull-box with the additional benefits of 50% more cable.

All core UTP plenum and riser products are available in all colors: LANmark-1000 | LANmark-6 | LANmark-350 | Hyper Plus 5e

FEATURES & BENEFITS

1500’ box virtually eliminates cable scrap.
- When installing standards compliant 90 meter horizontal cable runs or even "typical" 45 meter runs.

More efficient installations.
- More cable pulls per box
- Fewer box change-over’s
- Fewer boxes to breakdown or recycle
- Fewer boxes to handle or transport

Reduction in jobsite waste.
- 10%-15% reduction in cardboard per 1,000 ft

BOX DESIGN

Multi-layer corrugated box top for added strength with innovative thumb hole for better grip.
- Additional full flap box bottom resists carton sagging
- Reinforced corrugated material improves stacking strength
- Box is approximately 2 cu. ft. in size – 18”L x 12”W x 16.5”H

KEY CONTRACTOR COMMENT

“I never understood why a thousand feet of cable was the norm, especially when you consider that standards are in 300 foot increments. This new 1,500 foot box just makes sense for my jobs and my budget.”
– Monty F., VP of Business Development
